👨🏻‍💻 Work experience

EPAM Systems, Junior React/React Native Developer

November *2021 - Till now*

My main tasks:

— Created new functional React/React Native components using React Hooks, HOC and MobX/Redux state management library.
— Fixed bugs (bad layout, server errors, code errors, errors in the implementation of

pagination).

— Optimized existing React/React Native components with React Hooks and HOC (useCallback, React.memo, useEffect etc).

— Worked with app state (creating stores and backend requests).

— Added new features.

— Working with various React Native libraries.

— Fixing bugs in displaying components on different mobile devices.

— Working with Android Studio, XCode, use simulators.

— Worked with Jira and GitlLab.

#React #React-Native #Typescript #Javascript #JSON-server #React-Navigation #GraphQL #Apollo Client #FireBase #CSS Modules #Redux #Redux Saga #Redux Toolkit #MobX #Swagger #React DevTools #Jenkins #Gitlab #JIRA #GIT #NPM #VSCode #Android Studio
